

BL-160

Boiler Water Treatment

ACE BL-160 is a USDA authorized, single drum boiler water treatment formulated from a blend of caustic, phosphates, sludge conditioners and oxygen scavengers. **ACE BL160** is designed as a one-package treatment to prevent scale, corrosion and sludge build-up in normal operating conditions. The only other product required when using **ACE BL160** will be a steam line treatment such as **ACE BL150** .. if necessary.

FEATURES & BENEFITS

- Alkaline formula - prevents scale.
- Contains sulfite - controls oxygen pitting.
- Concentrated formula - cost effective performance.
- USDA authorized ... can be used in meat and poultry plants.

DIRECTIONS for USE: Product usage will vary with operating load, composition of make-up water and feedwater. An initial dosage of 1-gallon per 1000 gallons of water in the boiler is recommended Consult an ACE representative for complete program recommendations.

SAFETY: If ingested, drink large amounts of water. Do NOT induce vomiting. Seek IMMEDIATE medical help. For skin contact, flush with clean water for 15 minutes. Seek IMMEDIATE medical help if irritation persists. For eye contact, flush with clean water for 15 minutes, and seek IMMEDIATE medical help.

CAUTION: Contains Potassium Hydroxide. Avoid skin/eye contact. Wear gloves, protective clothing and goggles when using. Use in well-ventilated areas. Do not breathe vapors. **PROFESSIONAL USE ONLY. KEEP OUT OF THE REACH OF CHILDREN.**

PHYSICAL PROPERTIES

APPEARANCE	Clear Liquid
COLOR	Brown
pH	13.5
SPECIFIC GRAVITY	1.2
PACKAGING	5-gallon pail 30-gallon drum 55-gallon drum
