

STEAM-RITE (STR)

Boiler Cleaner & Conditioner

ACE STEAM-RITE (STR) is a concentrated phosphate-based powdered boiler cleaner and conditioner that contains a color indicator to insure proper use.

FEATURES & BENEFITS

- Stops Surging/Priming.
- Eliminates Scale and Prevents Corrosion.
- Contains Anti-Foaming Agent.
- No Draining Necessary.
- Color Indicator.

DIRECTIONS for USE: If possible, drain boiler and refill with clean water. Remove plug or safety valve before mixing a container of **ACE STEAM-RITE (STR)** powder (9 oz) with 1-gallon of clean water. Pour the **ACE STEAM-RITE (STR)** mixture into the boiler through the safety valve. Raise the steam boiler to normal operating temperature. Check sight valve - if water in gauge is deep red, add another container of **ACE STEAM-RITE (STR)**. When red color turns clear, the boiler is now in working condition. There is no need to drain the boiler after treatment. One container of **ACE STEAM-RITE (STR)** is generally sufficient to treat boilers generating 400-600 sq. ft. of steam radiation (96000-14000 BTU's). In cases where the sight glass remains red, it may be necessary to use **ACE STEAM RITE PLUS (SRP)**.

SAFETY: For skin contact, wash hands with clean soapy water. If irritation persists, seek **IMMEDIATE** medical help. For eye contact, flush with clean water for 15 minutes. If eye irritation persists, seek **IMMEDIATE** medical help. If swallowed, seek **IMMEDIATE** medical help - do not give anything by mouth to an unconscious person.

CAUTION: Contains Diatomaceous Earth (Cas#9031-183), Sodium Phosphate (Cas#7558-80-7), Sodium Ligninsulfonate (Cas#68131-31-7). **KEEP OUT OF REACH OF CHILDREN.**

PHYSICAL PROPERTIES

APPEARANCE	...	Powder
COLOR	White
ODOR	None
SPECIFIC GRAVITY	0.12
PACKAGING	12x9-oz units/case
